 All metal parts are treated against rust and polyester coated  
 Ropes and nets in 16 mm polypropylene rope with steel-wire reinforcement  
 Climbing grips in plastic  
 Non-slip rock wall  
 Galvanized base supports

### Product Description

Colourful playground equipment for children aged 2 to 6. It is a combination of the lions' den and the baby lobster. The playground equipment consists of 2 parts which are connected by a HDPE polyethylene crawling tunnel. The first part consist out of a wooden floor and 1 platform, on 85 cm, that can be reached via an easy accessible staircase. The platform can be left via a plastic or a spiral fireman's pole. The second part is also made up out of a wooden floor and 1 platform, on 85 cm. This platform can be reached via an easy accessible staircase, a climbing wall with plastic climbing grips and a colourful climbing net. On the side of the climbing net there is a round entrance through which children can crawl. The floor shelves are 22 mm thick. The 9 x 9 cm larch square posts are fixed into or onto the ground using metal base supports. This playground equipment has oak girders. All metal parts are treated against rust and all nuts and bolts are completely covered with flower-shaped protection caps. The mammoth comes largely assembled with ground fixings and may be placed on grass.
