S905

**4-12 YEARS**

**2-4 PERSONS-HOURS**

### Product Information

Product type	Bouncing and turning
Certification	EN-1176
Dimensions	1,9 x H 1,9 m (length x width x height)

### Technical Information

Maximum fall height	1,17 m
Security zone	18 m <sup>2</sup>
Number of children	8
Concrete required	
No surface fixation available	

### Materials

Metal tubes of 33 and 42 mm diameter are treated against rust and polyester coated  
 Maintenance-free axes and turning mechanisms  
 HDPE polyethylene sheet material  
 Ropes and nets in 16 mm polypropylene rope with steel-wire reinforcement

### Product Description

Rotating globe for children from 4 to 12 years. The colourful playground equipment combines the characteristics of a merry-go-round and climbing equipment. The playground equipment is made up of a globular tube construction from polyester-coated metal tubes with a diameter of 33 and 42 mm. Inside the globe, there is an oblique net climber on which children can sit or climb. The net is stretched inside a metal ring that protrudes from the globe construction. Just like on the merry-go-round, children can sit and stand on the metal ring made of polyester-coated metal tube with a diameter of 42 mm. The whole construction rotates on a maintenance-free rotation mechanism with double ball-bearings (below and above). All metal parts are treated against rust and all nuts and bolts are completely covered with flower-shaped protection caps.
