HDPE protection caps

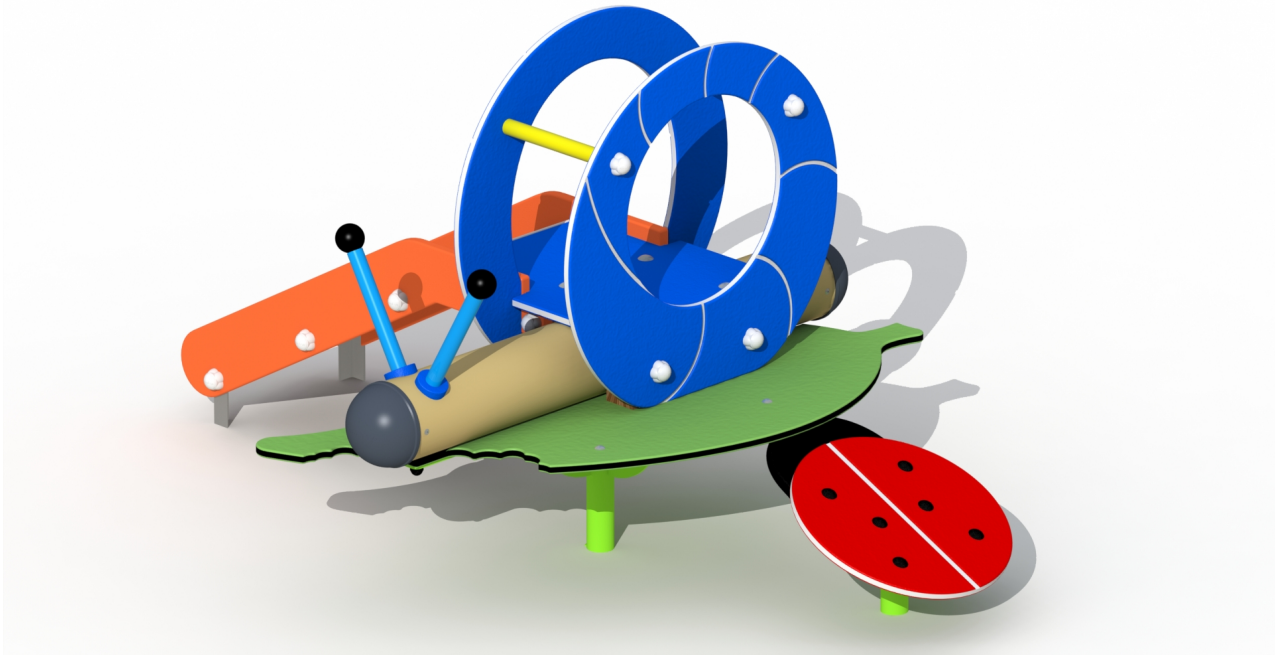

Product Description

Colorful playground equipment in the shape of a snail for children aged 1 to 2,5 years. The unit is made of 2 platforms. The children can climb from one side to the other by using the crawl-through rings of the snail-shell. This equipment is very low to the ground, which makes it very accessible for the youngest children, even for those who cannot walk yet. All metal parts are treated against rust and all nuts and bolts are fully covered with flower-shaped protection caps.
