 Metal corner supports are treated against rust and polyester coated
 Special tire seat on galvanized chains
 Maintenance-free swing hooks
 Galvanized metal base supports

 **3-4,5 PERSONS-HOURS**

Technical Information

Maximum fall height 1,50 m
 Security zone 56-61 m²
 Number of children 6
 Concrete required
 No surface fixation available

Product Description

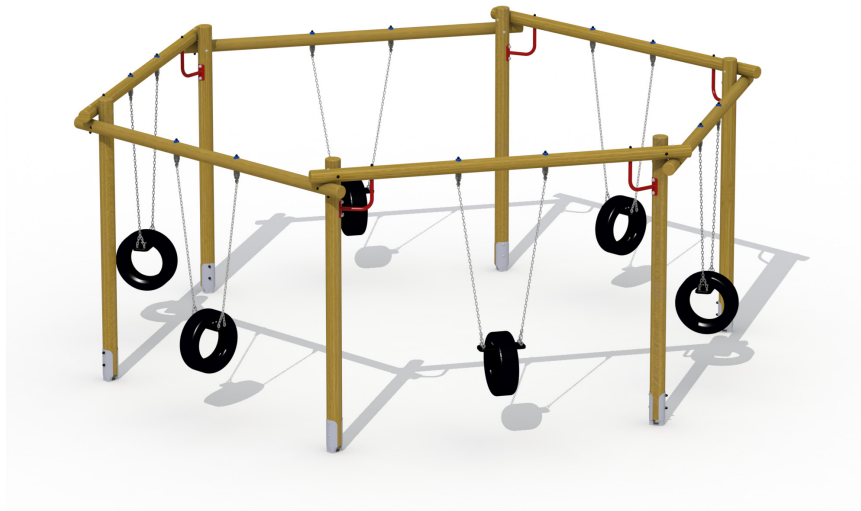

Wooden hexagonal swing for children from 6 to 15 years. The swing is made up of 6 larch stands with a diameter of 12 cm and six horizontal larch beams with a diameter of 14 cm. The vertical poles are connected with each other by the horizontal beams to form a hexagon. In the six corners, the swing is reinforced with red polyester-coated steel support brackets with a diameter of 42 mm. The special tire seats are attached to maintenance-free swing hooks using galvanized chains. The tire seats prevent children from jumping against each other while leaving the swing. At the bottom, the swing has metal galvanized shell-shaped pole supports that are fixed into the ground.
