Dimensions 1,4 x H 0,8 m
(length x width x height)

Materials

Metal tubes of 33 mm diameter are treated against rust and polyester coated
Maintenance-free axes and turning mechanisms
HDPE Polyethylene sheet material 19 mm thick

 2-3 PERSONS-HOURS

Technical Information

Maximum fall height 0,80 m
Security zone 22,5 m²
Number of children 6
Concrete required
No surface fixation available

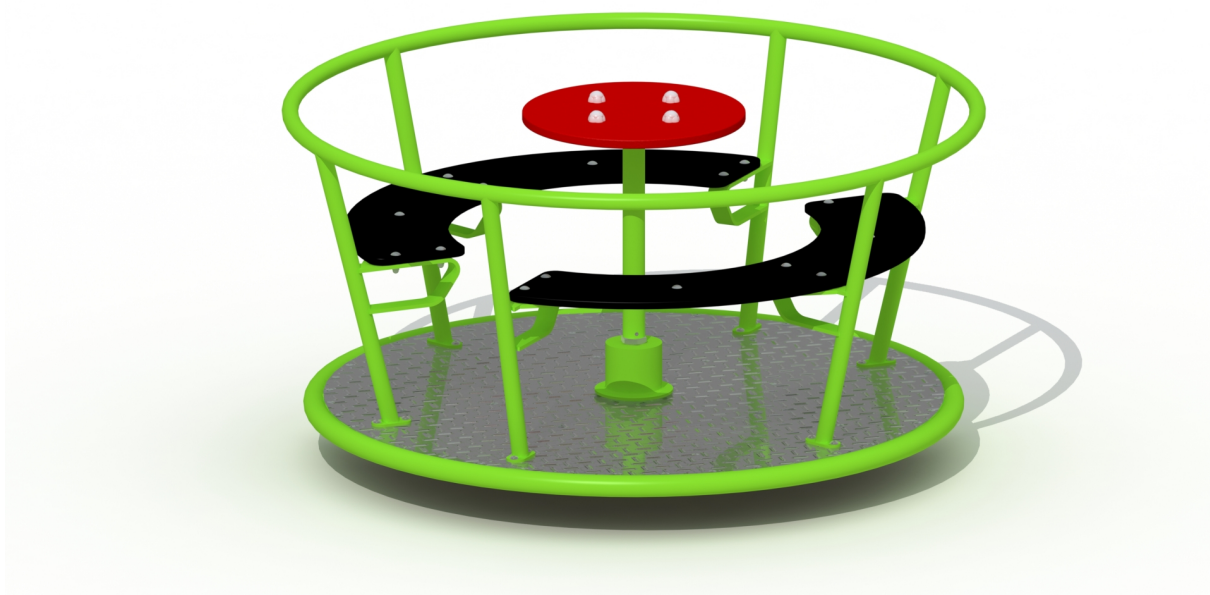

Product Description

Merry-go-round for children from 3 to 10 years. The colourful merry-go-round is made up of polyester-coated metal tubes with a diameter of 33 mm. The merry-go-round has two semicircular benches made of HDPE polyethylene, that are supported at three points by a metal support bracket. The metal floor plate is covered by an anti-slip HDPE polyethylene plate. The central steering wheel allows the children to determine the rotation speed. The merry-go-round rotates on a maintenance-free rotation mechanism with double ball-bearings (below and above). All metal parts are treated against rust and all nuts and bolts are completely covered with flower-shaped protection caps.
