 (length x width x height)

Technical Information

Maximum fall height m²
 Security zone
 Number of children 2
 No concrete required

Materials

Panel and disks in HDPE Polyethylene

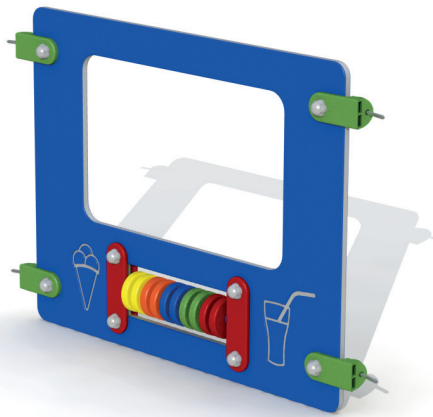

Product Description

Activity panel for children from 2 years. The activity panel 'shop' is made of HDPE polyethylene. There's a hole in the panel where the children can greet the customers. Under the hole you can find an abacus with colorful discs, that can help the children to count. This activity panel can be integrated in one of our existing play equipments (instead of a yellow sidewall) or can be used on it's own in combination with two roundwooden poles (S032). All nuts and bolts are completely covered by flower-shaped protection caps.
