 No surface fixation available

Product Description

Playground equipment for the little ones, from 2 to 6 years old, made out of robinia and larch wood. The ranger's cabin consists out of an elevated play house with terrace and plastic slide. The terrace can be reached by means of 3 stepping posts or a climbing net. The play house has 2 benches and a table on the inside as well as 2 windows so children on the inside can make contact with children on the outside. The windows also make sure parents can still keep an eye on their children. The house has a nice terrace on which children can be on the lookout. A small abacus disk panel is also present. The ranger's cabin is delivered partly preassembled.
